

Etherpad Install Tutorial

1. Download and Extract the folder and files for the Etherpad Moodle Module. If the main folder is not named 'etherpad' rename it to etherpad.

2. Upload or copy the etherpad folder and all the files to your moodle root/mod folder. This is the same process as installing any other Moodle module.

3. Login to your Moodle site and you should be prompted to install the new Etherpad activity.

Number of plugins requiring attention during this upgrade: 32

Display the full list of installed plugins

Plugin name	Directory	Source	Current version	New version	Status
Activity modules					
<input checked="" type="checkbox"/> Etherpad	/mod/etherpad	Extension		2012032800	To be installed

4. Scroll to the bottom of the page and click on Upgrade. You should see a successful installation message.

mod_etherpad

Success

5. Click Continue after seeing the successful installation message and you will be prompted to enter two settings for Etherpad. You will need your Etherpad Site URL and the Etherpad API key for your Etherpad Site.

New settings - Etherpad

etherpad | etherpad_apikey

api Key. Advanced Default: EtherpadFTW

etherpad | etherpad_baseurl

base Url. Advanced Default: http://beta.etherpad.org:9001

6. Let's find our Etherpad API Key for a self-hosted install of Etherpad. To do this navigate to where you installed Etherpad on your server. In the root folder please find etherpad root/APIKEY.txt
7. Open the APIKEY.txt file located in your Etherpad Root folder and copy the string of characters.
8. Paste the APIKEY into the field. Enter the base URL to your Etherpad website in the field provided.
9. Click Save Changes and you are ready to use Etherpad in Moodle.
10. Go to your course and add the Etherpad Activity. Enjoy!
